knowledge

Cardiovascular disease (CVD) is a major health problem and the leading cause of death in the world.

- Over **17.6 million** people in the world die every year as a result of CVD
- Every **2 seconds** a person dies
- There is a **lack of visibility** and availability of defibrillators
- **Late arrival** of rescue teams at the scene of an accident is common
- By 2030, almost **23.6 million people** a year will die from CVDs, mainly from heart diseases and strokes!
